## Introduction: Structural Classification and Researchroadmap

**The Cosmic Field Physics (CFP) framework** represents a coordinated theoretical and numerical effort aimed at integrating dark matter physics through pseudo-vector theory and advanced "Monster" cosmology. Within this theoretical model, the dynamics of baryonic matter are examined under the specific constraints of the "weak gravity condition," with an in-depth exploration of the physics underlying both hot and cold "weak" black holes. [1]

To provide insight into the synthesis of quantum gravity, cosmological-scale models, and computational simulations, the bibliography below is structured around three fundamental pillars: [1]

1. **Steady State Cosmology (Monster Physics & Animations):** An investigation into the conformal symmetries, time-phase spaces, and subatomic architectures that underpin a dynamic, stable universe. [1]
2. **Gravity Generation by Rarefied Dark Matter Medium:** The mathematical and mechanical elaboration of gravitational induction via rotating dark matter media and the Sakharov metric. [1]
3. **Dark Matter, Dark Energy, and Pseudo-Vector Theory:** The theoretical foundations and coherent boundary conditions that link quantum field theory with astrophysical observations. [1]

The list below contains the most current, validated publications, mathematical derivations, and source code (linked to unique Zenodo DOI references) that collectively form the formal basis of this cosmological paradigm. [1]

### Steady State Cosmology (Monster Physics & Animations)

- Conformal Gravity and Absolute Group symmetry
- The Conformal Helmholtz Time-Phase Space
- Bridging Conformal Gravity Unification to a Dark Matter Mediation Medium Based on Absolute Group Symmetry Mathematics
- Cosmic Background Radiation, Helium Redundancy, and Optical Horizon Kinematics in the Dynamic Steady-State Flywheel Universe
- The Subatomic Architecture of Weak Black Holes: Lepton-Quark Stratification, Observational Corrections, and Medium Hydrodynamics [1]

- The Conformal Helmholtz Time-Phase Space (Version B) Group-Theoretic Deduction of the Genesis Onset from Fischer 24 Sphere Symmetries and 3D Tetrahedral Projections

## Gravity Generation by Rarefied Dark Matter Medium

- Master Foundation Report: Framework for Coherent 3-Rotor Metric Modulation (Theoretical Core for Papers 1, 2, and 3)
- Cosmic Field Paradigm — Article 1: The Solar Energy Pump and Triple Rigid Rotor Framework
- Cosmic Field Paradigm — Article 2: Dipole Equivalence Mechanics and the Three-Atom Equilibrium
- Dynamic Gravity Generation by Three Rigid Rotors of Dark Matter: Algebraic Inversion, Group Symmetries, and Synchronization Constants (1)

## Dark Matter, Dark Energy, and Pseudo Vector Theory

- Derivation of the Coherent Boundary Conditions for Quantum Gravity
- Educational Foundations of the Cosmic Field Paradigm: Version B Conceptual Framework of the Weak Gravity Condition & Pseudo-Vector Field Theory
- The Perpetual Triplet Model and Sakharov Induction

Foundation Cosmic Field Paradigm ©

..... introductory text on standard particle theory and cosmology, the phenomena explained by them, unsatisfactory features of that explanation, and an alternative approach by the Cosmic Field Paradigm which (supposedly) cures those defects .....
